

SOUTH FLORIDA CUSTOM METAL

PRODUCT & CAPABILITIES CATALOG

CUSTOM METAL. MADE EXACT.

Fabrication | Gates | Fences | Railings | Powder Coating

Miami-Dade | Broward | Palm Beach

BUILT TO FIT. FINISHED TO LAST.

ONE SHOP. COMPLETE METALWORK.

South Florida Custom Metal serves homeowners, contractors, architects, developers and property managers with made-to-order fabrication and finishing.

We turn site dimensions, drawings, inspiration photos and practical requirements into finished metalwork ready for installation. Every project is reviewed for material, exposure, function, hardware, finish and field conditions before fabrication begins.

Residential

Distinctive gates, fences, handrails and architectural features for homes and communities.

CUSTOM DESIGN | COASTAL MATERIALS

Commercial

Repeatable fabrication, contractor coordination and project-specific metal packages.

SHOP DRAWINGS | PRODUCTION

MADE-TO-ORDER ENTRIES

CUSTOM GATES

Manual or automation-ready gate systems built to suit the opening, architecture and daily use.

Pedestrian Gates

Custom widths, privacy levels, patterns, locksets and self-closing hardware.

ALUMINUM | STEEL

Swing Gates

Single- and double-leaf driveway gates with reinforced frames and coordinated hardware.

MANUAL | AUTOMATED

Sliding Gates

Track, cantilever and large-opening solutions prepared for operator integration.

RESIDENTIAL | COMMERCIAL

Specialty Gates

Louvered, architectural, equipment, pool and project-specific gate assemblies.

CUSTOM PROFILES | CUSTOM FINISH

PERIMETER SYSTEMS

FENCES & PANELS

Fabricated sections can be adapted to residential, pool, privacy, architectural and commercial requirements.

Horizontal Slat

Modern privacy and semi-privacy panels with project-specific slat sizes and spacing.

ALUMINUM | POWDER COAT

Vertical Tube

Clean architectural panels using square or rectangular tubing in repeatable patterns.

CUSTOM SPACING | CUSTOM HEIGHT

Picket & Ornamental

Traditional and contemporary picket systems, including flat-top and decorative options.

ALUMINUM | STEEL

Louvered & Privacy

Angled or overlapping profiles that balance privacy, airflow and architectural appearance.

GATES | FENCE | SCREENS

Pool Barriers

Code-conscious aluminum fence and gate configurations for pool perimeter applications.

SELF-CLOSING GATES

Commercial Systems

Heavy-duty panels, security gates, equipment enclosures and perimeter packages.

GC COORDINATION | SUBMITTALS

ARCHITECTURAL SAFETY

RAILINGS & HANDRAILS

Designed around the setting, mounting conditions, required performance and desired level of transparency.

Guardrails

Balcony, terrace and elevated-edge protection in aluminum or stainless steel.

INTERIOR | EXTERIOR

Handrails

Wall-mounted and post-mounted rails for stairs, ramps and walking surfaces.

ALUMINUM | 304 SS | 316 SS

Cable Rail

Minimal-profile stainless cable systems with fabricated posts and top rails.

COASTAL OPTIONS

Pool & Specialty Rails

Project-specific rails, barriers and removable or fixed metal components.

CUSTOM FABRICATION

CHOOSE FOR PERFORMANCE

MATERIAL GUIDE

The right metal depends on strength, location, exposure, appearance, maintenance and budget.

Aluminum

Lightweight and naturally corrosion-resistant. A strong choice for exterior gates, fences, railings and architectural components.

POWDER COAT | COASTAL USE

Carbon Steel

Strong, versatile and cost-effective for structural frames, heavy-duty gates and fabricated assemblies when properly protected.

PRIMER | POWDER COAT

304 Stainless Steel

A refined corrosion-resistant option for many interior and exterior architectural applications.

BRUSHED | POLISHED

316 Stainless Steel

Higher resistance to salt and aggressive coastal exposure. Preferred for demanding marine-adjacent environments.

COASTAL | PREMIUM

Galvanized Steel

Zinc-protected steel suited to exterior and commercial applications requiring added corrosion resistance.

WELDED | COATED

Mixed-Material Builds

Metal can be coordinated with wood-look inserts, composite, glass, masonry and access-control hardware.

PROJECT SPECIFIC

Final alloy, gauge, profile, weld method, coating system and fasteners are confirmed per project. Coastal suitability depends on the complete assembly and maintenance plan.

COLOR IS PART OF THE BUILD

POWDER COATING & FINISHES

A durable oven-cured finish for new fabrication, gates, railings, fence sections and contractor-supplied metal parts.

Color

Standard, RAL and project-specific selections coordinated with the architecture.

BLACK | WHITE | BRONZE | CUSTOM

Sheen

Gloss, satin and matte options change both appearance and how a surface reads in sunlight.

GLOSS | SATIN | MATTE

Texture

Smooth, fine texture and specialty effects can help achieve the intended visual character.

SMOOTH | TEXTURED | METALLIC

Preparation

Cleaning and surface preparation are matched to the substrate and coating specification.

QUALITY STARTS BEFORE COLOR

CONTROLLED FROM START TO FINISH

HOW A PROJECT MOVES

Clear approvals before fabrication help control dimensions, appearance, hardware and installation fit.

01

DISCOVER

Share the address, drawings, dimensions, photographs, design direction and schedule.

02

DESIGN

Confirm layout, profiles, spacing, material, hardware, finish and field conditions.

03

APPROVE

Review the proposal and applicable shop drawings or visual references before production.

04

FABRICATE

Cut, fit, weld, grind and inspect the assembly through the shop workflow.

05

FINISH

Prepare and powder coat or apply the specified architectural finish.

06

DELIVER / INSTALL

Complete final quality review, protect for transport and coordinate field installation.

FASTER, MORE ACCURATE QUOTING

WHAT TO SEND US

The more complete the starting information, the faster we can define scope and price responsibly.

Project location

Address, municipality and whether the work is residential or commercial.

Drawings or dimensions

Plans, elevations, opening widths, heights and relevant field measurements.

Photos

Wide context photos plus close views of mounting points, grade, walls and obstructions.

Design direction

Inspiration images, preferred profiles, spacing, privacy level and architectural style.

Material & finish

Aluminum, steel, 304/316 stainless, color, sheen and exposure conditions.

Function & hardware

Manual or automated operation, access control, locks, closers and usage frequency.
